

# Laser Industry Contribution Award

## Support by research grants in the field of laser processing

### THE AMADA FOUNDATION

#### ● Grant research result presentation

#### ● Grant research ceremony

#### ● Exhibition

#### ● Publishing

**The Amada Foundation's mission is to develop *people*, further *knowledge*, building a brighter *future*.**

The Amada Foundation is a public interest incorporated foundation created to increase the growth of Japanese industry and economy through academic support, innovation of new technology, and employment support for personnel. Since its establishment, the cumulative number of research grants from is 1,919, and the grant amount is 3,207 million yen. The Foundation has been subsidizing research in the laser processing field since 2007, and it has also been subsidizing the development of youth researchers since 2017. A major feature of the foundation's public service is that it is not just grants for research but is actively raising awareness and publishing the research results of those that have been funded. It is actively developing various awareness and educational activities so that valuable research results can be widely implemented in industry from the "information packed" researchers.

**The Amada Foundation will continue to contribute to the development of researchers, academic advancement, and industrial development.**
