

Laser Industry Contribution Award

Contribution to domestic science and the laser industry through high-quality single crystals and laser sources

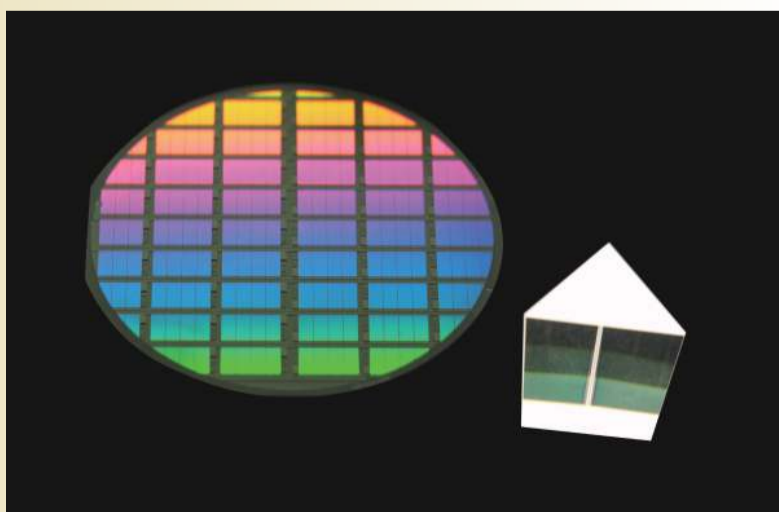

OXIDE

OXIDE Corporation

Since our foundation in 2000, with the aim of being a global niche company of single crystals and lasers, we have been accumulating cutting-edge technologies and establishing originality and competitive advantage in the field of optics. The 21st century is said to be the age of light. With the mission of "**Realizing prosperity with optical technology**", we shall continue to contribute to society with crystals and optics.

● Deep UV lasers for semiconductor inspection

● Frequency conversion devices

● High-quality single crystals
