

RICOH FC-LDA Printer

Ricoh Company, Ltd.

Product Features

- Equipped with a 192 channels light source arranged in an array and laser drivers that can control the light sources independently at high speed
- By combining with the specialized thermal ink, it is possible to print monochrome bitmap images of 200 dpi and 256 gradations at a high speed of 300m/min

Product Values

- Variable information can be printed directly on bottle labels, etc. in the high-speed production lines with this product.
 - Printing efficiency improvement
 - Resource saving
- In the past, to add variable information to mass-produced products in the high-speed production line, it was necessary to print and attach a sticker or the like in the other processes.
