

Laser Industry Award for Excellent Product

OptoComb 3D scanners & Absolute Rangefinder

XTIA Ltd.

Features & Applications

● A revolution for manufacturing

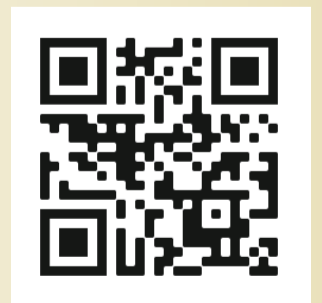

The unique OptoComb laser technology by XTIA is the base for a range of fast and high-accuracy measurement solutions dedicated to the manufacturing industry: 3D scanning, automated in-line inspection, range finding and more.

● Complex 3D geometry scanning

With their unique coaxial configuration and their long working distance, OptoComb 3D scanners can provide the full 3D profile of the most complex parts with a resolution as high $1\mu\text{m}$.

● Range finding up to 90m

OptoComb absolute range finders can measure absolute distances up to 90m with an error smaller than $7\mu\text{m}$. Ideal for laser tracking, precision assembly & alignment and more!
