

Laser Industry Award for Excellent Product

External Cavity Tunable Laser (TSL Series)

santec

santec LIS Corporation

Features

● Proven Technological Leadership

Pioneers of the world's first external-cavity tunable laser in 1988, and continuous advancement of the photonics industry since then.

● Industry-Leading Performance

Wide tuning range with mode-hop-free operation, combined with high speed, high output power, and narrow linewidth to meet challenging market needs.

● Trusted Quality and Reliability

Our proven quality and reliability are recognized worldwide, supporting applications from advanced research to high-volume production testing.

Applications

- Optical component characterization
- Advanced photonics research
